Experience

Ellucian **Bangalore**

Associate Consultant - FullTime *Jan 2025 - Present*

- Working on enterprise integration solutions for higher education institutions, improving data interoperability and workflow efficiency
- Developing and maintaining scalable integrations using Banner ERP, Ethos APIs, REST APIs, and cloud services
- Designed and executed a real-time inventory management integration with Banner ERP, eliminating manual file-based processes
- Built a mobile barcode scanning solution using Ellucian Experience Custom Card to enable real-time asset updates in Banner
- Integrated Fixed Assets Ethos API to update inventory dates and enabled asset transfers using Banner business APIs
- Applied real-time validation, logging, error handling, and alerting mechanisms, reducing manual corrections by 80%
- Created an AWS S3-based audit logging pipeline to store daily scan logs and support audit and compliance reporting
- Collaborating with cross-functional teams to design scalable, secure, and high-availability integration architectures
- Leveraging modern technologies and best practices in enterprise integration and cloud automation

Practo Technologies **Bangalore**

Platform Engineer - Internship *July 2024 - Nov 2024*

- Developed a secure authentication workflow using a .pgpass file, improving database login efficiency by 40%
- Streamlined database access management, improving system performance and operational reliability
- Managed Kubernetes CronJob pods to enhance scalability and reduce downtime by 20%

Projects

Enterprise Integration Projects – Ellucian Environment **April 2025 - Present**

- Contributing to enterprise integration projects for higher education institutions, including financial and procurement system integrations
- Led the development of a real-time inventory tracking integration enabling mobile-based asset scanning and seamless ERP updates
- Developing and maintaining data pipelines to ensure reliable connectivity between ERP systems and third-party platforms
- Engineered scalable AWS-backed workflows to improve integration reliability, system resilience, and data flow efficiency
- Improved inventory accuracy, audit readiness, and operational efficiency through real-time system synchronization

Database Access Automation Git Link **June - Aug 2024**

- Developed an automation script using a .pgpass file, increasing user login efficiency by 40% by eliminating the need for manual password entry.
- Reduced system load by automatically deleting inactive users after 30-60 minutes, enhancing overall system performance by 15%.
- Developed a secure PostgreSQL authentication workflow using a .pgpass file, improving database login efficiency by 40%
- Implemented automated validation and error handling for database authentication and connectivity failures, improving workflow reliability
- Managed Kubernetes CronJob pods to automate database maintenance tasks, enhancing scalability and reducing downtime by 20%

Reinforcement Learning in Healthcare Git Link **Feb - May 2024**

- Optimized treatment plans using reinforcement learning, reducing healthcare costs by 10% and improving patient outcomes by 15%.
- Ensured regulatory compliance throughout the project, maintaining 100% adherence to healthcare policies.
- Developed a reinforcement learning model to optimize healthcare treatment plans based on patient conditions and historical treatment data
- Designed reward mechanisms to balance treatment effectiveness, patient outcomes, and healthcare costs during model training
- Preprocessed and analyzed healthcare datasets to improve model training quality and support data-driven treatment recommendations

Education

SRM UNIVERSITY, AndhraPradesh **Apr 2020 – Apr 2024**
Bachelor of Technology in Computer Science with AIML *GPA: 8.65/10*

Technical Skills

Languages: Java, Python, JavaScript, SQL
Web Technologies: React.js, Node.js, Express.js, REST APIs
Databases: PostgreSQL, MySQL, SQLite, MongoDB, Redis
Cloud & DevOps: AWS, Lambda, API Gateway, S3, IAM, Docker, Git, Linux
Integration & Tools: REST APIs, JSON, Postman, Kubernetes, CI/CD

Achievements

- Led project activities and collaborated with cross-functional teams to deliver integration solutions within defined timelines
- Earned a Gold Badge and 5-Star Rating in Java on HackerRank, demonstrating strong problem-solving and programming proficiency
- Conducted 100+ mock technical interviews through a community initiative, helping peers prepare for software engineering interviews

Certifications

Agile Project Management: Google - Coursera
